

"All we do is security...
that's it, end of story."
Datassurant

Datassurant is a leading provider of information security and compliance management solutions to the government, large and small businesses and the public sector. Datassurant provides organizations throughout the world with solutions to help them validate compliance with a variety of industry standards and regulations including PCI DSS, PA-DSS, SOX, FISMA, DITSCAP, NIACAP, HIPAA, GLBA, ISO/IEC 27002, E13PA, 3DS and others.

Datassurant's clients include financial organizations, large and small retailers, merchants, global electronic exchanges, educational institutions, and business service firms, along with many local, state and federal government agencies.

Datassurant helps commercial and government organizations conduct business securely while achieving and maintaining compliance. Our vendor-neutral, risk based approach to security, and client specific balance of business and security, is yet another example of what sets Datassurant ahead of its competitors.

Datassurant is headquartered in Virginia and Toronto with office locations and security labs in New York and Montreal.

Information Security. Assured.®

Michael La Barge
Datassurant Founder

REPUTATION

Datassurant is a leading security company providing compliance related services. Datassurant is quickly closing the gap between itself and its largest competitors, by providing superior Payment Card Industry Data Security Standard (PCI DSS) and compliance related services at competitive yet reasonable prices.

PROACTIVE

Datassurant is a consulting firm that truly believes and understands that open and honest communication between ourselves and the customer is paramount. As your organization's trusted security partner, we understand

the complexities of security and compliance challenges that your organization faces. A Datassurant engagement manager will be there for you every step of the way, From the initial kick-off meeting through until the final presentation, we will be your primary contact for all engagement activities, before during and after each security engagement.

PRESENCE

At many other information security companies, the consultants are minimally trained and approach every company with a standard checklist. At Datassurant, our expert consultants are highly trained and certified to work with you beyond the standard checklist, in order to uncover potential vulnerabilities. Because hackers and thieves work around the clock to find new ways to break into your systems, it is critical to remove these risks. Datassurant also works around the clock; is one of the most responsive in the industry, and has a 24-hour rapid response time.

STRATEGY

Datassurant's approach in using web-based compliance management solutions helps your organization's path toward compliance easy and efficient. The use of our compliance management solutions allows organizations to strengthen the security

of their networks; conduct automated security audits to confirm remediation efforts; and ensure compliance with policies and regulations. This approach is strategic in that compliance can be achieved in less time, at a lower total cost, while drastically reducing the associated learning curve of new technology.

EXCELLENCE

Focusing on delivering quality not quantity security and compliance offerings is another example of how Datassurant clearly sets itself apart from its competitors. We deliver quality services and it shows. All engagement managers and QSA consultants undergo extensive, mandatory, quality assurance training and are trained to the Six Sigma Green Belt level.

EXPERIENCE

From our management team to our consulting teams, Datassurant's staff has significant experience in designing and delivering enterprise-level information security and compliance solutions for businesses in many verticals including:

- Banking/Financial Services
- Medical/Healthcare
- Retail
- Commercial
- Government

Having a broad base of experience allows Datassurant to tailor technology and services to easily meet and exceed your organization's security and compliance requirements.

Our mission is smarter security.

*Security isn't just one thing we do.
It's the only thing we do.*

Enterprise

PCI Compliance Service Offerings

Policy Development and Policy Review

Datassurant's experienced experts will work with your organization in the design, creation and implementation of a highly effective set of enterprise security policies. Policies are frequently considered the foundation of a successful security program. This policy development offering, by design, assists with and supports PCI compliance requirements.

PCI Compliance Assessment Scoping

PCI compliance assessment scoping includes a thorough review of your company's current business processes, cardholder data flows and devices that are involved in processing, storing or transmitting cardholder data to determine all PCI compliance significant systems.

PCI Compliance Self-Assessment Seminar

A PCI security self-assessment seminar is a facilitated session led by one of our PCI engagement managers and a QSA-certified assessor to assist all functional business areas in preparing for and completing a PCI compliance self-assessment.

PCI Compliance Baseline Assessment

QSA-certified assessors will assess all control areas of the current PCI DSS version; conduct a control gap analysis; provide a best practices remediation plan as part of the Initial Report of Compliance (IROC); and deliver a summary of findings as part of the final Report of Compliance (ROC) indicating your organization's compliance status.

PCI Compliance Remediation Services

Before, during and after the assessment, Datassurant's experienced staff will provide you with the expertise and assistance in determining appropriate remediation actions and compensatory controls for any areas that are found to be non-compliant with the most current PCI DSS version requirements.

PCI Compliance Enterprise Package
